CASE REPORT
CASE# 2023-00020141

NARRATIVE

On March 25, 2023, at 1745 hours, I was working as 2W1 in uniform at **Seattle Waterfront District**. I was dispatched to a possible deceased body that was found on the rocks under the pier at Pier 66.

Upon arrival, I contacted several Seattle Police units and three subjects who were standing on the rocks with a Seattle Police officer under the pier, closest to Anthony's Fish House. The three subjects were later identified as [REDACTED], [REDACTED], and Thomas S. Osborn (07/13/1972). It was discovered [REDACTED] and [REDACTED] are friends and they decided to explore under the pier before an event at Lumen Field. Ian later explained to me that he and [REDACTED] hopped over the fence near the south side of Pier 66 by Anthony's, and they climbed down to the rocks and began scaling through the rocks beneath the pier.

[REDACTED] and [REDACTED] climbed the entire east side wall of rocks, all the way to the most northern point to where the rock wall ends. At the northern end, near the Edgewater Hotel, [REDACTED] and [REDACTED] discovered what they believed to be human remains. Both boys climbed the rocks back to the south end and called [REDACTED] father Thomas. Thomas then called 911, with Seattle Police and Port of Seattle Police responding.

Officer J. Vaaga #8397, was the officer who was standing on the rocks with [REDACTED] and [REDACTED]. Officer Vaaga scaled the rocks with the boys, so they could show Officer Vaaga where they located the possible body. Officer Vaaga confirmed via radio that the discovered remains were human.

Seattle Fire Department and the Seattle Fire boat were dispatched to the scene. The Seattle Fire boat extracted the boys and father, along with Officer Vaaga from under the pier. The Seattle Fire boat was also able to successfully extract the body and transfer the body into a body bag.

The King County Medical examiners, Applegate and Myrabo, responded to the scene and provided Seattle Fire with their body bag for transfer. Seattle Fire transported the body to station 5 (waterfront station), where they released the body to the Medical Examiners.

The body appeared to be in a severe state of decomposition, and partially skeletonized. The body had a pair of socks still attached to both feet, and some sort of "speedo" or partial "thong" type of underwear on. At the time of this report, the body has not been identified, but was only able to be identified as a male. According to Officer Vaaga, there did not appear to be anything suspicious under the pier where the body was recovered.

The weather conditions were sunny and 47 degrees, and the water temperature was approximately 40 degrees.

The body was transported to the King County Medical Examiner's Office for further inspection, KCME #23-928.

Officer Vaaga is completing a case report for Seattle Police, see SPD #23-81335 for further details.

Photos were taken on scene and uploaded to Evidence.com.

Port of Seattle Police Detective Sergeant Benko was notified.
